PDP IT Academy
online video course

2021 - 2022

Bachelor degree
Korea International University
in Ferghana

2021 - 2025

SKILLS

Java
Spring & Spring boot
Database - Postgresql
ReactJs
VCS

LANGUAGE

Uzbek
English

Experience

2023 May - present
Epam Systems - Tashkent
Java Developer

Full stack developer. I am working in internal project of Epam Systems as a team member.

I developed some parts of the project. It is my first work as a team member.

I learned scrum methodology, team working and improved communication skills with team members. Also learned more things from mentors, team leads.

2023 January - 2023 May
Epam Laboratory - Tashkent
Intern Student

I have created a system of gift certificates with 3 versions separated by the levels of technology used. Online service of certificates, orders, tags and users with access to storage in the database, viewing, modifying, adding and deleting information.

2022 July - 2022 December
Epam Training Center - Tashkent
Student(Full Stack)

As a student at Epam training center I developed my own website called "Скачки" - "Horse racing". Horse Race website - online service of horse race (generation by hand) with role-based access rights, storage in the database, registration, authentication, viewing, adding and deleting information, viewing own statistics and balance, booking for any race, horse and positions.
